Oseghale Caleb Iredia

AI Data Annotator · Computer Science Graduate · MERN Stack Developer

Lagos, Nigeria (WAT, UTC+1) · Available for remote work · +234 815 020 1699 · caleboseghale@gmail.com · github.com/Iredia23 · linkedin.com/in/oseghale-caleb-iredia

SUMMARY

- AI data annotator at Guild since February 2026, producing training data for AI models from robot manipulation videos
- Holds certificates in AI Fluency (Anthropic), Prompt Engineering Essentials and AI Voice and Audio, all earned in 2026
- Computer Science graduate (Second Class Upper, CGPA 3.70/5.00) who built a full-stack MERN application with a Gemini-powered AI assistant
- Explains technical ideas plainly, drawing on experience as a teaching aide in IT training classes

SKILLS

- **AI training data:** video annotation and data labelling to project guidelines; reviewing and fact-checking AI output
- **Prompting and AI fluency:** structured prompts (role, task, context, output format) and iteration; Anthropic's 4D AI Fluency framework (delegation, description, discernment, diligence); Claude, Google Gemini API, AI-assisted coding and testing
- **AI voice and audio:** text-to-speech, transcription and captions, AI dubbing and translation, responsible voice cloning
- **Core software:** JavaScript, React, Node.js, Express.js, MongoDB, HTML, CSS, Git and GitHub
- **Working knowledge:** Python (pytest), Java, C++, MQL4, SQL (MySQL, SQLite), GitHub Actions, Linux command line, TCP/IP and network security fundamentals
- **Foundations (coursework):** data structures and algorithms, databases, computer networks, operating systems, software engineering, artificial intelligence

EXPERIENCE

AI Data Annotator (Robot Manipulation Videos) · Guild · February 2026 – Present

- Label the actions in videos of robots handling objects, producing training data for AI models
- Apply the project's annotation guide consistently on every task
- Completed 25 annotation tasks to date

IT Support and Teaching Aide (SIWES Industrial Training) · Digital Fortress Institute, Lagos · June 2025 – November 2025

- Provided IT support to staff and students, resolving computer and software issues
- Assisted instructors in the institute's IT training classes, guiding students through practical exercises

PROJECTS

AI Evaluation Samples (ongoing) · github.com/Iredia23/ai-evaluation-samples

- Side-by-side evaluations of AI assistant answers to computer science questions, each checked independently and scored on correctness, completeness, reasoning, safety and clarity

Integrated Lecture Scheduling System with Automated Timetable Generation Capabilities (final year project) · MERN stack, Google Gemini API · github.com/Iredia23/ILSSATGC

- Replaced FUT Minna's manual scheduling with a web system that automates course allocation and timetable generation and keeps scheduling information in one place
- Built a constraint-based scheduler that prevents venue, lecturer and student-group clashes, spreads lectures across the week, and reports any course it cannot place with the reason
- Secured five user roles with role-based access, JWT authentication and bcrypt password hashing
- Added an optional AI scheduling assistant powered by Google's Gemini API

GPA Analyzer · Python, pytest, GitHub Actions · github.com/Iredia23/gpa-analyzer

- Command-line tool that turns a CSV of exam scores into grades, GPAs, CGPAs, degree classes and course statistics on the Nigerian 5-point scale
- Reports each invalid row and why, rounds borderline CGPAs correctly with decimal arithmetic, and runs 66 automated tests on every push

Expense Tracker · Python, SQLite, pytest, GitHub Actions · github.com/Iredia23/expense-tracker

- Command-line app that records income and expenses in SQLite, with monthly summaries, spending charts and CSV import and export
- Prevents SQL injection with parameterised queries, stores money as whole kobo to avoid rounding errors, and runs 76 automated tests on every push

Three MA Cross trading bot (MetaTrader 4) · MQL4, Python · github.com/Iredia23/three-ma-cross-ea

- Expert Advisor that trades on closed candles when a shifted moving average of the open crosses the high and low moving averages, reversing on the opposite signal
- Supports risk-based position sizing, a safety stop loss and a maximum-spread filter, validates its settings at start-up, and rounds stops to the symbol's tick size
- Logic checked with a Python simulation across 20 runs of 1,500 simulated candles

EDUCATION

B.Tech. Computer Science · Federal University of Technology, Minna · 2026

Second Class Upper (2:1) · CGPA 3.70/5.00

CERTIFICATIONS

- **AI Fluency: Framework & Foundations** · Anthropic · 2026
- **Prompt Engineering Essentials** · FreeAcademy.ai · November 2026 · Credential ID FA-2026-MPE-4FWS6U
- **AI Voice and Audio** · FreeAcademy.ai · November 2026 · Credential ID FA-2026-AVAA-24MB9P
- **Cybersecurity Essentials** · Cisco Networking Academy · 2025
- **Networking Essentials** · Cisco Networking Academy · 2025
