Oseghale Caleb Iredia

Computer Science Graduate · Cybersecurity & Networking

Lagos, Nigeria · +234 815 020 1699 · caleboseghale@gmail.com · github.com/Iredia23 · linkedin.com/in/oseghale-caleb-iredia

PROFILE

Computer Science graduate (Second Class Upper, 2026) from the Federal University of Technology, Minna. Built a full-stack lecture scheduling and timetabling system with the MERN stack, and gained IT support and teaching experience during industrial training. Currently works as an AI data annotator on robot manipulation videos. Fluent with AI tools such as Claude, writing clear prompts and checking every output before relying on it. Holds certificates in AI fluency (Anthropic), prompt engineering, and AI voice and audio. Keen to build a career in cybersecurity.

EDUCATION

B.Tech. Computer Science · Federal University of Technology, Minna · 2026

Second Class Upper (2:1) · CGPA 3.70/5.00

Relevant coursework: Data Structures and Algorithms · Database Systems · Computer Networks · Operating Systems · Software Engineering · Artificial Intelligence

TECHNICAL SKILLS

- **Programming:** Python, Java, C++, MQL4
- **Web:** HTML, CSS, Tailwind CSS, JavaScript, React, Node.js, Express.js
- **Databases:** MongoDB, SQL (MySQL, SQLite)
- **Tools:** Git and GitHub, GitHub Actions, pytest, Linux command line, VS Code, Microsoft Office
- **Networking and security:** TCP/IP, network fundamentals, security principles
- **AI fluency:** Anthropic's 4D framework (delegation, description, discernment, diligence); prompt engineering (role, task, context, output format; iteration); Claude and Google Gemini; reviewing and fact-checking AI output; AI-assisted coding, testing and documentation
- **AI voice and audio:** text-to-speech, transcription and captions, AI dubbing and translation, responsible voice cloning
- **AI data:** video annotation and data labelling for model training

EXPERIENCE

AI Data Annotator (Robot Manipulation Videos) · Guild · February 2026 – Present

- Label the actions in videos of robots handling objects, producing training data for AI models
- Completed 25 annotation tasks to date, following the project's annotation guide

IT Support and Teaching Aide (SIWES Industrial Training) · Digital Fortress Institute, Lagos · June 2025 – November 2025

- Provided IT support to staff and students, resolving computer and software issues
- Assisted instructors as a teaching aide in the institute's IT training classes, helping students through practical exercises

PROJECTS

Final year project: Integrated Lecture Scheduling System with Automated Timetable Generation Capabilities · MERN stack (MongoDB, Express.js, React, Node.js), HTML, CSS · github.com/Iredia23/ILSSATGC

- Built a web system that automates the university's course allocation and timetable generation, replacing manual scheduling
- Centralised scheduling information in one system, removing the information silos caused by communication breakdowns
- Added an optional AI scheduling assistant powered by Google's Gemini API

Expense Tracker · Python, SQLite, pytest, GitHub Actions · github.com/Iredia23/expense-tracker

- Command-line app that records income and expenses in SQLite, with monthly summaries, spending charts and CSV import and export
- Prevents SQL injection with parameterised queries, stores money as whole kobo to avoid rounding errors, and runs 76 automated tests on every push

GPA Analyzer · Python, pytest, GitHub Actions · github.com/Iredia23/gpa-analyzer

- Command-line tool that turns a CSV of exam scores into grades, GPAs, CGPAs, degree classes and course statistics on the Nigerian 5-point scale
- Reports each invalid row and why, rounds borderline CGPAs correctly with decimal arithmetic, and runs 66 automated tests on every push

Three MA Cross trading bot (MetaTrader 4) · MQL4, Python · github.com/Iredia23/three-ma-cross-ea

- Expert Advisor that trades on closed candles when a shifted moving average of the open crosses the high and low moving averages, reversing on the opposite signal
- Supports risk-based position sizing, a safety stop loss and a maximum-spread filter, validates its settings at start-up, and rounds stops to the symbol's tick size
- Logic checked with a Python simulation across 20 runs of 1,500 simulated candles

Omola Concept website · HTML, Tailwind CSS, JavaScript · github.com/Iredia23/omola-concept

- Responsive 13-page website for a Lagos fashion boutique, with a filterable shop, product pages and a shopping bag saved in the browser
- Sends orders to the boutique by Instagram DM or email, and covers search-engine and accessibility basics

AI Evaluation Samples (ongoing) · github.com/Iredia23/ai-evaluation-samples

- Side-by-side evaluations of AI assistant answers to computer science questions, each checked independently and scored on a five-part rubric

CERTIFICATIONS

- Networking Essentials · Cisco Networking Academy · 2025
- Cybersecurity Essentials · Cisco Networking Academy · 2025
- AI Fluency: Framework & Foundations · Anthropic · 2026
- Prompt Engineering Essentials · FreeAcademy.ai · November 2026 · Credential ID FA-2026-MPE-4FWS6U
- AI Voice and Audio · FreeAcademy.ai · November 2026 · Credential ID FA-2026-AVAA-24MB9P
